Smithereen is the leader in providing *Integrated Pest Management* to the Healthcare Industry. Smithereen offers a partnership with our clients that results in the safest solution to pest problems and prevention of future problems.

The goal and practice of Smithereen's Integrated Pest Management (IPM) Program is to prevent pests rather than cope with them after they arrive. At Smithereen Pest Management we work to develop a customized pest control program based on the current pest problems affecting the healthcare facility, structural factors of the property and seasonal conditions that contribute to pest activity.

Healthcare facilities require specialized documentation to satisfy the requirements of Local, State and Federal government agencies. Smithereen provides you with all the relevant documentation for your customized pest management program through our *Accutrak System*®.

Smithereen Pest Management is the only company that has the ability to work "one-on-one" with your staff to bring a fully functioning customized pest management program to reality.

For over 121 years Smithereen's relationship building and attention to detail at every level of client contact has provided a value "unmatched" in the pest control industry. It's not about Smithereen's program, it's about our partnership and your pest management program. Smithereen is, "**YOUR PARTNER FOR A HEALTHY ENVIRONMENT**".

So Green
We blend into your environment
undisturbed

Green Pest Management Programs

Smithereen is the leader in Integrated and Low Environmental Impact Pest Management, also referred to as Green Pest Management. Our service comprises three basic components: *INSPECTION, PROBLEM SOLVING* and *COMMUNICATION*.

Smithereen offers extensive and effective Green, Low Environmental Impact programs designed to control a wide variety of structural pests. Exclusion, Behavior Modifications and Sanitary Assessments along with green formulations as natural repellents and baits are included in the program.

Leadership in Energy and Environmental Design (LEED®)

Smithereen, "*Your Partner for a Healthy Environment*", can partner with you to complete your pest control eligibility requirements for LEED® certification. Smithereen employees have demonstrated a thorough understanding of green building practices and principles by pursuing and receiving **LEED® Professional Accreditation**. Smithereen is an active member of the U.S. Green Building Council and local chapters.

Smithereen's Green Shield Certified Service

Smithereen continues to lead the industry as a provider of Green Shield Certified Service. Smithereen's Green Shield Certified Service means smarter, more effective pest control without unnecessary pesticide use. Smithereen certified professionals solve the underlying cause of pest problems, providing lasting control.
